Github: <https://github.com/mrogers23458>

Driven, full stack web developer with experience creating websites, and client-side/server-side applications. Proficient in HTML, CSS, Bootstrap, JavaScript, jQuery, Node, MySQL and React. Strong collaboration skills and proven history of application development.

TECHNICAL SKILLS

Github, Gitlab, Gitbash, HTML, CSS, Bootstrap, Foundation, Bulma, JavaScript, jQuery, APIs, Node.js, MySQL, React, Wireframe, ApolloServer, ApolloClient, Node, React, Express, GraphQL, NoSQL, Sequelize, SQL.

PROJECTS

Recipe-Champion | UCD Web Development

HTML/JS - Developer

- Interactive client-facing web app to find recipes by ingredient.
- This project used Javascript to fetch data from API Spoonacular, and populate a JS based word cloud from which the user can select recipes. Dynamically generated recipe cards provide the user with a picture, as well as ingredients used / missing from the recipe.
- Deployed: <https://mrogers23458.github.io/recipe-champion/> | Code: <https://github.com/mrogers23458/recipe-champion>

Clean-App | Personal Project

Full-Stack Developer

- The purpose of the project was to create a full stack progressive web app to help organize cleaning tasks.
- This app was made with an expanded MERN stack, incorporating ApolloClient/Server and graphql.
- Deployed: <https://mrogerscleanapp.herokuapp.com/> | Code: <https://github.com/mrogers23458/clean-app>

Friend-Blog | Personal Project

Full-Stack Developer

- The purpose of the project was to create a full stack progressive web app to create a space where friends could make posts and leave each other comments.
- This app was made with an expanded MERN stack, incorporating ApolloClient/Server and graphql. I built upon my knowledge of previous applications, to refine the code in this application.
- Deployed: <https://mrogers23458-friend-blog.herokuapp.com/> | Code: <https://github.com/mrogers23458/game-blog>
